ERA releases 2018 Sustainability Report

Energy Resources of Australia Ltd (ERA) has today released its Sustainability Report for the year ended 31 December 2018.

The Sustainability Report summarises ERA's performance in regard to key safety, environmental, community engagement and workforce diversity objectives.

ERA's Chief Executive Paul Arnold said: "This Sustainability Report reflects the commitment of ERA to care for country and people. ERA has a strong record of protecting the environment surrounding the mine and we are demonstrating good progress toward rehabilitation of the mine site even as operations continue."

"I am proud to acknowledge the contribution of everyone at ERA towards these outcomes. It is only with the support of our people that these outcomes are made possible." Mr Arnold said.

Mr Arnold noted that the diversity of the ERA team is a key strength for ERA, in particular the above industry average for Aboriginal and female employee participation. Diversity is an area in which the Company always strives to do better.

Mr Arnold also expressed the Company's appreciation for the support received from the Mirarr, Traditional Owners of the land on which the Ranger mine is located, especially in respect to driving toward a future for Jabiru and endorsement of the Ranger Mine Closure Plan.

Some of the key achievements highlighted in the 2018 Sustainability Report include:

- 13% Aboriginal and Torres Strait employment;
- All Injury Frequency Rate of 0.56 in 2018 compared to 1.17 in 2017;
- \$10.7 million paid in royalties (over \$500 million since production commenced);
- \$100 million contributed to Jabiru through salaries and local spend;
- Public release of the Ranger Mine Closure Plan; and
- \$59 million invested in Ranger rehabilitation (\$511 million since 2012).

The 2018 ERA Sustainability Report is available to view on the ERA website <http://www.energyres.com.au/media/reports/>

The Sustainability Report will be regularly updated and made available on the Company's website.

About Energy Resources of Australia Ltd

Energy Resources of Australia Ltd (**ERA**) is one of the nation's largest uranium producers and Australia's longest continually operating uranium mine.

ERA aims to provide clean energy to the world and, as a trusted partner, care for people and country.

ERA has an excellent track record of reliably supplying customers. Uranium has been mined at Ranger for more than 35 years. During that time, Ranger has produced in excess of 128,000 tonnes of uranium oxide.

ERA's Ranger mine is located eight kilometres east of Jabiru and 260 kilometres east of Darwin, in Australia's Northern Territory. ERA is a major employer in the Northern Territory and the Alligator Rivers Region.
